**Berks Digital Inc. Welcomes Community to visit
renovated office and printing facility.**

Berks Digital Inc. recently held a ribbon cutting ceremony and open house for members of the community to visit their recently renovated office and print center at 2620 Hampden Boulevard in Reading.

Berks Digital is best known for quality design and printing of business collateral for the local business community as well as banners and in store signage. These services are provided to local business and not for profit organizations as well as large national clients.

“We are proud to be part of the Greater Reading community and look forward to an expanded roll in servicing local businesses with their print marketing needs” said Brown.

Berks Digital Inc. was formed in 2005 to address the increasing need for business to control their costs, by reducing obsolescence of their printed materials through OnDemand short run printing. Berks Digital operated out of the home basement of owners Elaine and Gary Brown before moving to their current location in March of 2008. Renovations have been ongoing since that time and this ribbon cutting and open house signifies the belated grand opening to the community.
